DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 3/10/04 is acknowledged since it is filed in compliance with 37 CFR 1.97 and 1.98. The references therein have been considered.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-20, drawn to an apparatus for playing a game including a plurality of points, a game piece, a random number generator, classified in class 273, subclass 274.
 - II. Claims 21-33, drawn to a method of playing a game using a game board, a method of wagering, random number generating, making determinations, and resolving the wagers, classified in class 273, subclass 274.
 - III. Claims 34-37, drawn to a random number generator, classified in class 273, subclass 138.1. The inventions are distinct, each from the other because of the following reasons:
3. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP §

806.05(e)). In this case, the process can be practiced by another materially different apparatus, such as an apparatus that does not require one or more betting areas.

4. Inventions (I,II) and III are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed, such as the random number generator having six sides with the markings as claimed. The subcombination has separate utility such as a device that is used as a display piece with six sides.

5. A telephone call was made to Kelly W. Cunningham on 4/12/2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
